

Hi Panther,

I just wanted to let you know how much I love my Panther CAT headset. I fly the B-727 which has a very noisy cockpit. I have used other headsets in the past including Telex's best ANR headset. There is no comparison as the Panther CAT is in a class by itself. It has outstanding noise reduction and performance. I am amazed at the comfort of the ear pieces, clarity of reception and transmissions and the fact that it doesn't use any batteries and has no boom mike. I'll never use any other headset!

Michelle Helms
